CAUTIONARY STATEMENTS

FORWARD-LOOKING STATEMENTS

Certain statements contained in this presentation may be deemed “forward-looking statements” within the meaning of the United States Private Securities Litigation Reform Act of 1995 and “forward-looking information” within the meaning of applicable Canadian securities legislation. Forward-looking statements are statements other than statements of historical fact, that address, without limitation, future events, production estimates of Osisko’s assets (including increase of production), the revised 2024 guidance on GEOs and the 5-year outlook on GEOs included under “Guidance for 2024 and 5-Year Outlook” and other guidance based on disclosure from operators, timely developments of mining properties over which Osisko has royalties, streams, offtakes and investments, management’s expectations regarding Osisko’s growth, results of operations, estimated future revenues, production costs, carrying value of assets, ability to continue to pay dividend, requirements for additional capital, business prospects and opportunities, future demand for and fluctuation of prices of commodities (including outlook on gold, silver, diamonds, other commodities) currency, markets and general market conditions. In addition, statements and estimates (including data in tables) relating to mineral reserves and resources and statements and revised guidance as to gold equivalent ounces are forward-looking statements, as they involve implied assessment, based on certain estimates and assumptions, including the assumptions set out under “Guidance for 2024 and 5-Year Outlook”, and no assurance can be given that the estimates or related revised guidance will be realized. Forward-looking statements are generally, but not always, identified by the words “expects”, “plans”, “anticipates”, “believes”, “intends”, “estimates”, “projects”, “potential”, “scheduled” and similar expressions or variations (including negative variations), or by statements that events or conditions “will”, “would”, “may”, “could” or “should” occur. Forward-looking statements are subject to known and unknown risks, uncertainties and other factors, most of which are beyond the control of Osisko, and actual results may accordingly differ materially from those in forward-looking statements. Such risk factors include, without limitation, (i) with respect to properties in which Osisko holds a royalty, stream or other interest; risks related to: (a) the operators of the properties, (b) timely development, permitting, construction, commencement of production, ramp-up (including operating and technical challenges), (c) differences in rate and timing of production from resource estimates or production forecasts by operators, (d) differences in conversion rate from resources to reserves and ability to replace resources, (e) the unfavorable outcome of any challenges or litigation relating to title, permit or license, (f) hazards and uncertainty associated with the business of exploring, development and mining including, but not limited to unusual or unexpected geological and metallurgical conditions, slope failures or cave-ins, flooding and other natural disasters or civil unrest or other uninsured risks; (ii) with respect to other external factors: (a) fluctuations in the prices of the commodities that drive royalties, streams, offtakes and investments held by Osisko, (b) fluctuations in the value of the Canadian dollar relative to the U.S. dollar, (c) regulatory changes by national and local governments, including permitting and licensing regimes and taxation policies, regulations and political or economic developments in any of the countries where properties in which Osisko holds a royalty, stream or other interest are located or through which they are held, (d) continued availability of capital and financing to Osisko or the operators of properties, and general economic, market or business conditions, and (e) responses of relevant governments to infectious diseases outbreaks and the effectiveness of such response and the potential impact of such outbreaks on Osisko’s business, operations and financial condition; (iii) with respect to internal factors: (a) business opportunities that may or not become available to, or are pursued by Osisko, (b) the integration of acquired assets or (c) the determination of Osisko’s Passive Foreign Investment Company (“PFIC”) status. The forward-looking statements contained in this presentation are based upon assumptions management believes to be reasonable, including, without limitation: the absence of significant change in the Company’s ongoing income and assets relating to determination of its PFIC status; the absence of any other factors that could cause actions, events or results to differ from those anticipated, estimated or intended and, with respect to properties in which Osisko holds a royalty, stream or other interest, (i) the ongoing operation of the properties by the owners or operators of such properties in a manner consistent with past practice and with public disclosure (including forecast of production), (ii) the accuracy of public statements and disclosures made by the owners or operators of such underlying properties (including expectations for the development of underlying properties that are not yet in production), (iii) no adverse development in respect of any significant property, (iv) that statements and estimates relating to mineral reserves and resources by owners and operators are accurate and (v) the implementation of an adequate plan for integration of acquired assets.

For additional information on risks, uncertainties and assumptions, please refer to the most recent Annual Information Form of Osisko filed on SEDAR+ at www.sedarplus.ca and EDGAR at www.sec.gov which also provides additional general assumptions in connection with these statements. Osisko cautions that the foregoing list of risk and uncertainties is not exhaustive. Investors and others should carefully consider the above factors as well as the uncertainties they represent and the risk they entail. Osisko believes that the assumptions reflected in those forward-looking statements are reasonable, but no assurance can be given that these expectations will prove to be accurate as actual results and prospective events could materially differ from those anticipated such the forward-looking statements and such forward-looking statements included in this presentation are not guarantee of future performance and should not be unduly relied upon. In this presentation, Osisko relies on information publicly disclosed by other issuers and third-parties pertaining to its assets and, therefore, assumes no liability for such third-party public disclosure. These statements speak only as of the date of this presentation. Osisko undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, other than as required by applicable law.

SAFE HARBOUR STATEMENT

This presentation has been prepared for informational purposes only in order to assist prospective investors in evaluating an investment in Osisko Gold Royalties Ltd. The information related to mining operators provided in this presentation has been sourced from public disclosure. Inquiries regarding this presentation can be made to the senior management of Osisko.

CAUTIONARY NOTE TO U.S. INVESTORS REGARDING MINERAL RESERVE AND MINERAL RESOURCE ESTIMATES

Osisko is subject to the reporting requirements of the applicable Canadian securities laws, and as a result, reports its mineral resources and reserves according to Canadian standards. Canadian reporting requirements for disclosure of mineral properties are governed by National Instrument 43-101 (“NI 43-101”). The definitions of NI 43-101 are adopted from those described by the Canadian Institute of Mining, Metallurgy and Petroleum (“CIM”). In a number of cases Osisko has disclosed resource and reserve estimates covering properties related to the mining assets that are not based on CIM definitions, but instead have been prepared in reliance upon JORC and S-K 1300 (collectively, the “Acceptable Foreign Codes”). Estimates based on Acceptable Foreign Codes are recognized under NI 43-101 in certain circumstances. New mining disclosure rules under Subpart 1300 of Regulation S-K became mandatory for U.S. reporting companies beginning with the first fiscal year commencing on or after January 1, 2021. CIM definitions are not identical to those of the Acceptable Foreign Codes, the resource and reserve definitions and categories are substantively the same as the CIM definitions mandated in NI 43-101 and will typically result in reporting of substantially similar reserve and resource estimates. Nonetheless, readers are cautioned that there are differences between the terms and definitions of the CIM and the Acceptable Foreign Codes, and there is no assurance that mineral reserves or mineral resources would be identical had the owner or operator prepared the reserve or resource estimates under another code.

Mr. Guy Desharnais, Ph.D., P.Geo., is the qualified person for this presentation as defined by National Instrument 43-101 – Standards of Disclosure for Mineral Projects and has reviewed and verified the technical information contained herein. Mr. Desharnais is an employee of Osisko Gold Royalties and is non-independent.

SENIOR-QUALITY PORTFOLIO, LEADING GROWTH POTENTIAL

CORE BENEFITS OF THE ROYALTY & STREAMING BUSINESS MODEL

ROYALTY & STREAMING MODEL

KEY BENEFITS

- ◆ Highly efficient and scalable business model
- ◆ Significant asset and cash-flow diversification
- ◆ No direct capital, operating or exploration cost exposure
- ◆ Insulated from inflationary cost pressures
- ◆ Optionality to exploration success, mine life extensions and expansions
- ◆ High margins provide sustainable cash-flow generation and shareholder returns throughout the commodity cycle
- ◆ Leverage to precious metals prices

COMMITTED TO SUSTAINABILITY

OSISKO'S ESG STRATEGY COMMITS TO UPHOLD SUSTAINABLE BUSINESS PRACTICES AND GROW RESPONSIBLY

Five Key Components Underpinning ESG Strategy:

DUE DILIGENCE

Conduct extensive due diligence on investments to ensure adherence to responsible mining practices

CLIMATE CHANGE

Conduct business in a way that protects the environment and, where possible, help our mining partners achieve climate-related goals

SOCIAL CONTRIBUTIONS

Support the communities that host our offices and partner assets

HEALTH & SAFETY

Encourage the health, safety, and well-being of all our employees

DIVERSITY, EQUITY & INCLUSION

Foster an environment that prioritizes diversity, equity and inclusion

WE SUPPORT

UN Global Compact Participant

World Gold Council Member

(i) Canada, USA, Australia

CANADIAN MALARTIC COMPLEX

Open Pit, East Gouldie, Odyssey South & western half of East Malartic – 5.0% NSR Royalty

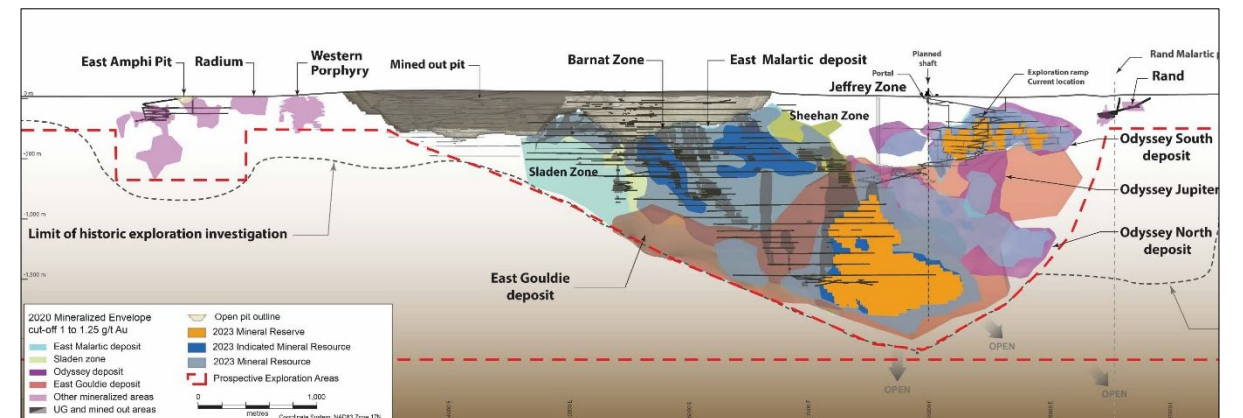

+ Odyssey North and eastern half of East Malartic – 3.0% NSR Royalty

+ Any ore processed from outside CM property – \$0.40/t Mill Royalty

Québec, Canada | Agnico Eagle Mines Limited

- ◆ Flagship royalty on Canada’s 2nd largest operating gold mine
- ◆ Average of ~580koz Au produced annually over 2023 - 2028 from Barnat Pit and Odyssey Underground (open pits are exhausted by 2028)⁵
- ◆ Underground steady state production plan of 500- 600koz of gold per year starting in 2028 once shaft access is complete⁵
- ◆ Current mine plan from 2023 Internal Study extends to 2042 and only includes approximately 57% of the existing resource ounces⁶
- ◆ Agnico is evaluating the potential of a series of mineralized veins collectively termed the “Odyssey internal zones” to provide additional feed to the processing plant in the near and medium term
 - Odyssey internal zones indicate the potential to further increase production during the 2024-2029 transition period from combined open-pit and underground mining to 100% underground mining
- ◆ Studying potential to accelerate first underground production from East Gouldie into 2026 (from 2027) as ramp progress is ahead of schedule⁷

Source: Agnico Eagle Mines Ltd. (February 2024)

CANADIAN MALARTIC COMPLEX

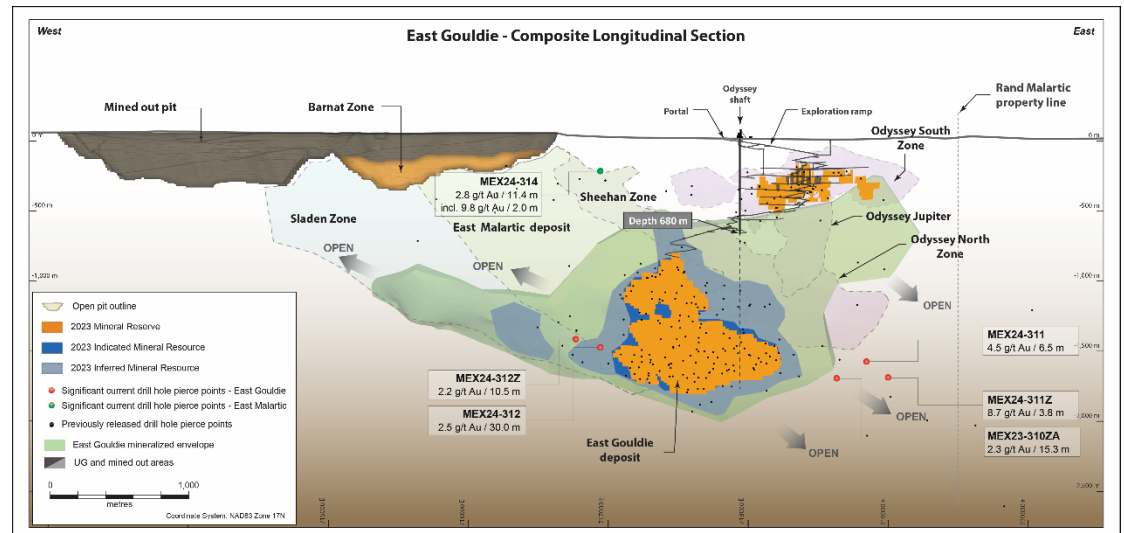

Open Pit, East Gouldie, Odyssey South & western half of East Malartic – 5.0% NSR Royalty

+ Odyssey North and eastern half of East Malartic – 3.0% NSR Royalty

+ Any ore processed from outside CM property – \$0.40/t Mill Royalty

Québec, Canada | Agnico Eagle Mines Limited

- ◆ Complex expected to have ~40ktpd of excess mill capacity starting in 2028⁷
- ◆ Shaft #2 at Odyssey Underground currently in concept phase; additional clarity on potential Shaft #2 and Agnico Eagle’s “Fill the Mill” strategy expected over the next 1-2 years⁸
 - A potential Shaft #2 could add ~15k GEOs to OR’s annual earned GEOs *over and above* the current mine plan, starting in the early 2030’s (and at no additional cost to OR)⁽ⁱ⁾⁸
- ◆ Regional optimizations currently being studied for Wasamac (no OR royalty) with results expected in 2025⁹
- ◆ Recent exploration success east of East Gouldie: 4.5 g/t Au over 30.0m and 1,060m east of East Gouldie Mineral Reserves, and 3.1 g/t Au over 32.8m and 420m east of lower portion of East Gouldie Mineral Reserves⁹

Source: Agnico Eagle Mines Ltd. (July 2024)

(i) Projected GEOs estimated internally by Osisko Gold Royalties Ltd. based on publicly released information from the operator. Estimates based on the following assumptions: 10,000 tpd of additional ore tonnage; average gold grade of 2.75 g/t Au; 94.6% overall gold recovery; and a 5% NSR Royalty rate¹⁰

MANTOS BLANCOS

- ◆ Phase I expansion (MBCDP) commercial production achieved in December 2022¹¹
 - Processing rate increased to 7.3 Mtpa (from 4.2 Mtpa) & mine life extended to 2038¹¹
 - Plant & process bottlenecks worked through in 2023 & H1 2024¹¹
- ◆ Phase I steady-state throughput of 20ktpd expected in H2 2024 with the final installation of additional key infrastructure in late July 2024¹²
- ◆ Annual silver production expected to average ~1.3Moz over the first five years of Phase I¹¹
- ◆ Feasibility study for Phase II Expansion to at least 27ktpd anticipated in 2025 to potentially further increase metal production¹²
- ◆ The selected final pit was divided into operational phases, resulting in a total of eight phases to define the life-of-mine (LOM 2020)¹³

100% Silver Stream⁽ⁱ⁾
Antofagasta, Chile | Capstone Copper Corp.

(i) Osisko's silver stream is on a 2-month lag; Osisko, through its wholly-owned subsidiary Osisko Bermuda Limited, owns a 100% silver stream on Mantos Blancos. Under the stream agreement, Osisko Bermuda will purchase 100% of payable silver produced at Mantos Blancos until 19.3 Moz have been delivered and 40% of payable silver thereafter for the remaining LOM.

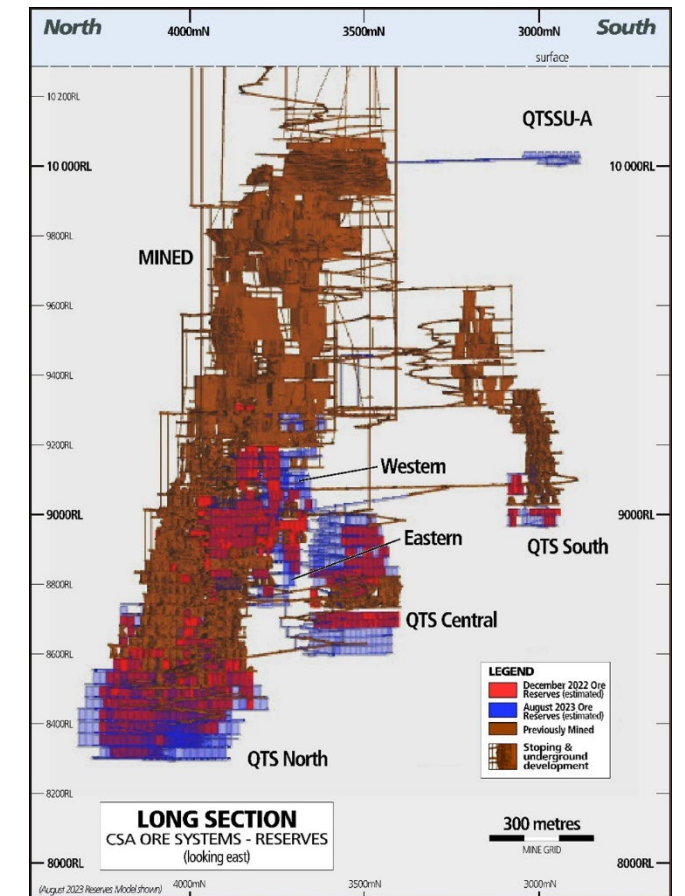

100% Silver Stream + 3.0-4.875% Copper Stream
 New South Wales, Australia | Metals Acquisition Limited

- ◆ High-grade underground copper mine in a Tier 1 mining jurisdiction with significant operating history¹⁴
- ◆ **April 2024 MRE Update:** Mineral Reserve life increased +67% to 11 years (from 6 years, previously) based on lower cut-off grade (lower costs) and drilling completed up until August 2023¹⁵
 - ◆ 2023 Mineral Reserve only extends 95m vertically below the current decline position¹⁵

- ◆ 2024-2025 silver production from CSA to average ~518koz per annum (April 2024 life of mine plan), and copper production to average ~43ktpa (updated production guidance from April 2024)¹⁵
- ◆ Effective economic date of the silver stream was February 1, 2023; Effective economic date of the copper stream is June 15th, 2024 with first deliveries received in July 2024¹⁶
- ◆ Minimum 6-year ROFR (as of June 15th, 2024) over future royalties / streams sold on any asset owned or purchased by MTAL¹⁶

Location of the 2023 Mineral Reserve compared to the 2022 Mineral Reserve

Source: Metals Acquisition Limited (April 2024)

CASCABEL

- ◆ Long-life, tier-1⁽ⁱⁱⁱ⁾ copper-gold asset with attractive development economics
- ◆ Positive Pre-Feasibility Study completed in Q1 2024 estimates total production over an initial 28-year mine life of 2.9Mt Cu, 6.9Moz Au and 18.4Moz Ag¹⁷
- ◆ Current mine plan only considers the exploitation of 18% of the Measured and Indicated Mineral Resources from the Alpala deposit¹⁷
- ◆ Large land package with significant near-mine and regional exploration potential, including Tandayama-America deposit located directly north of Alpala¹¹
- ◆ Supportive government and local communities- Exploitation Contract signed with the Government of Ecuador on June 5, 2024 outlines the fiscal and legal frameworks for the development of Cascabel¹⁸
- ◆ Partnership with Franco-Nevada on robust gold stream with phased investment as the project advances – complements Osisko's existing royalty¹⁹
- ◆ Average LOM stream deliveries to Osisko Bermuda ~12,000 GEOs per annum, including ~23,000 GEOs per annum for the first 10 years¹⁹
- ◆ Gold stream includes adjustment mechanisms to preserve the economics in the event of changes to the scale of the project or timeline of development¹⁹

Source: SolGold plc (April 2024)

6% Gold Stream⁽ⁱ⁾⁽ⁱⁱ⁾ + 0.6% NSR Royalty
Imbabura, Ecuador | SolGold plc

(i) Attributable basis - 6% gold stream until 225,000 oz are delivered, at which point the gold stream reduces to 3.6%.

(ii) 100% basis (30% Osisko Bermuda Limited, 70% Franco-Nevada (Barbados) Corp.) – 20% gold stream until 750,000 oz are delivered, at which point the gold stream reduces to 12%.

(iii) Please refer to SolGold plc's press release titled "SolGold plc Key Financial Developments" and dated May 14, 2024 available on SolGold's SEDAR+ profile at www.sedarplus.ca.

DALGARANGA

1.8% GRR Royalty (+ 1.35% GRR Royalty on Proximal Exploration Licenses)
Western Australia, Australia | Spartan Resources Limited

- ◆ Dalgaranga is located in Western Australia, one of the most prolific and well-established mining jurisdictions and is one of the best gold development and production re-start projects globally
- ◆ Dalgaranga, a recently mined open pit operation currently on care & maintenance, has been rejuvenated by very impressive new high-grade discoveries, most notably at the Never Never and Pepper deposits, which have shifted the focus towards ore extraction via underground mining methods
- ◆ The 2.5Mtpa Dalgaranga mill (gravity & CIL) is **fully-permitted** and the project has a clear path to near-term first gold with first production from underground likely re-commencing within the next 2 years²⁰
- ◆ High-grade discoveries at the Project continue to drive ongoing underground mineral inventory growth and a large +2,000km² land package also provides exciting exposure to new discoveries in the prolific Murchison Gold District
- ◆ Spartan expects to complete a Mineral Reserve Estimate update and a Feasibility Study both within H1/25; the new underground mine plan will serve as the basis for Spartan's Final Investment Decision to re-start operations²¹

Note: Some details have been excluded for regulatory and compliance

AN IMPORTANT PHASE OF GROWTH

GUIDANCE AND 5-YEAR OUTLOOK²²

(oz AuEq)

- ◆ This 2024 outlook replaces the previous outlook (published on February 20, 2024); the 5-Year Outlook is unchanged.
- ◆ This outlook (published on February 20, 2024) is based on publicly available forecasts from our operating partners. When publicly available forecasts on properties are not available, Osisko obtains internal forecasts from the producers or uses management’s best estimate.
- ◆ The 2024 guidance uses current 2024 consensus commodity prices and a gold/silver price ratio of 83:1. The 5-year outlook uses current long-term consensus commodity prices and a gold/silver price ratio of 76:1.
- ◆ Optionality bar is illustrative only:
 - “Development” defined as partner having *at least* completed a Preliminary Economic Assessment (or more) on the project;
 - “Exploration” defined as partner having completed a Mineral Resource Estimate (MRE) on the project or is in the process of exploratory drilling in or to be working towards an initial MRE.

(i) The commencement of deliveries from the CSA Copper Stream started on June 15th, 2024 (economic effective date); first physical deliveries were received on July 7th, 2024.

APPENDIX

ADDITIONAL KEY PRODUCING ASSETS

EAGLE (SUSPENDED)

5% NSR Royalty
Yukon, Canada | Victoria Gold Corp.

- Operations were suspended in late June 2024 after a heap leach pad failure occurred; production remains suspended²⁹
- A default under the Eagle Royalty Agreement dated April 13, 2018, was triggered and consequently, Osisko provided a Notice of Default to Victoria on July 4, 2024³¹
- A full non-cash impairment loss of C\$67.8 million based on management's assessment of the *current* situation & outlook³²
- In August 2024, the Ontario Superior Court of Justice appointed PwC as receiver and manager of all the assets, undertakings and property of the Victoria Gold Corp³³

ÉLÉONORE

2.2-3.5% NSR Royalty
Québec, Canada | Newmont Corporation

- Gold production from Éléonore totaled 217 koz and 232 koz in 2022 and 2023, respectively³⁴
- 2023 production was impacted by ~ 6-week wildfire-related evacuation of the mine¹¹
- Gold production guidance for 2024 set at 270koz Au³⁵
- As part of Newmont's portfolio optimization initiatives, the company is seeking to divest six non-core assets; *Éléonore is included on this list*³⁵

SEABEE

3.0% NSR Royalty
Saskatchewan, Canada | SSR Mining Inc.

- Throughout its 30-yr operating history, Seabee has consistently replenished its Au reserves; ongoing exploration initiatives aim to ensure more of the same¹¹
- With increased contribution from medium-grade Gap Hanging Wall area, SSR Mining expects mine grades to be aligned with mineral reserve grades and drive annual run rate gold production of ~75,000 oz over the next 5-yr period (from 2024 onward; 90,000 oz produced in 2023)³⁶
- 2024 gold production guidance range of 75-80koz Au³⁶

SASA

100% Silver Stream
North Macedonia | Central Asia Metals plc

- An updated mine plan announced in March 2023 extended mine life to 2039 based on currently defined reserves and resources³⁷
- In H2/22, Sasa began transitioning from sub-level caving to cut & fill mining, and long-hole stoping w paste backfill³⁸
- During H1/24, new paste backfill plant operated consistently; he first long-hole stopes have also been put into production, and additional stopes will follow during H2/24 & 2025³⁸
- 2024 guidance trending towards lower end of tight range, similar to 2023³⁸

ISLAND GOLD / MAGINO

1.38%-3% NSR Royalty
Ontario, Canada | Alamos Gold Inc.

- March 2024: Alamos announced friendly acquisition of Argonaut Gold Inc. and the Magino gold mine immediately adjacent to Island Gold³⁹
- Previously planned Phase 3+ mill expansion construction work no longer required following acquisition of the 10ktpd Magino mill, located 2.0km from the Island Gold shaft³⁹
- Small fraction of the eastern limit of the Magino pit is covered by a 3% NSR royalty; production expected in 2030¹¹
- 2024 Island Gold production guidance range of 145 -160koz gold due to higher grades; Island grades are expected to increase further into 2025 and beyond⁴⁰

GIBRALTAR

87.5% Silver Stream
British Columbia, Canada | Taseko Mines Limited

- Proven and Probable reserves recently increased 40% to 706Mt grading 0.25% copper⁴¹
- Taseko announced signing of a definitive agreement to purchase Sojitz's 12.5% effective interest in Gibraltar for a minimum of \$60M over a five-year period⁴²
- Amendments completed to increase the effective stream percentage by 12.5% to 87.5%; in addition, the step-down delivery threshold was extended resulting in an additional ~+1.5Moz silver to Osisko at the tail end of the LOM⁴³

ENDNOTES

1. Gold equivalent ounces (“GEOs”) are calculated on a quarterly and half-yearly basis and include royalties and streams. Silver ounces and copper tonnes earned from royalty and stream agreements are converted to gold equivalent ounces by multiplying the silver ounces or copper tonnes by the average silver or copper price for the period and dividing by the average gold price for the period. Diamonds, other metals and cash royalties are converted into gold equivalent ounces by dividing the associated revenue by the average gold price for the period. For average metal prices used, refer to the Portfolio of Royalty, Stream and Other Interests section of Osisko Gold Royalties’ MD&A for three and six months ended June 30, 2024 and published on August 6, 2024.
2. Cash margin is a non-IFRS financial performance measure which has no standard definition under IFRS. It is calculated by deducting the cost of sales (excluding depletion) from the revenues. Please refer to the non-IFRS measures provided under the Non-IFRS Measures section of the Osisko Gold Royalties Ltd’s press release titled “Osisko Announces Q2 2024 GEO Deliveries, Record Cash Margin and Select Asset Updates” and dated July 8, 2024. A cash margin of 96.6% was reported for the three months ended June 30, 2024; <https://osiskogr.com/en/osisko-announces-q2-2024-geo-deliveries-record-cash-margin-and-select-asset-updates/>.

21. Refer to Spartan Resources Limited’s press release titled “Dalgaranga Gold Project – Exploration Update: “Belt-Scale Potential Confirmed as Pepper Grows Rapidly and New Discoveries Emerge” and dated September 24, 2024.
22. Refer to Osisko Gold Royalties’ MD&A for the three and six months ended June 30, 2024, and published on August 6, 2024.
23. Mineral Resource and Mineral Reserve figures are only estimates. Such estimates are expressions of judgment based on knowledge, mining experience, analysis of drilling results, and industry practices. While Osisko believes that the Mineral Resource and Mineral Reserves estimates, as applicable, in respect of properties in which Osisko holds royalties, streams, or other interests reflect best estimates performed by or on behalf of the owner of such properties, the estimating of Mineral Resource and Mineral Reserves is a subjective process and the accuracy of Mineral Resource and Mineral Reserve estimates is a function of the quantity and quality of available data, the accuracy of statistical computations, and the assumptions used and judgments made in interpreting available engineering and geological information. There is significant uncertainty in any Mineral Resource and Mineral Reserve estimate and the actual deposits encountered and the economic viability of a deposit may differ materially from estimates. Estimated Mineral Resource and Mineral Reserves may have to be re-estimated based on changes in prices of gold or other minerals, further exploration or development activity, or actual production experience. This could materially and adversely affect estimates of the volume or grade of mineralization, estimated recovery rates, or other important factors that influence such estimates. In addition, there is no assurance that any Mineral Resource estimate will ultimately be reclassified as proven or probable Mineral Reserves. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability. If operators reduce their Mineral Reserves and Mineral Resources on properties underlying Osisko’s royalties, streams, or other interests, this may result in a material and adverse effect on Osisko’s profitability, results of operations, financial condition, and the trading price of Osisko’s securities. The Mineral Resources disclosed are based on the best available information as of April 22, 2024. Resources are exclusive of reserves in all cases. Gold equivalent ounces comprise mostly gold, other elements are converted assuming forecast long-term prices from analyst consensus published on March 4, 2024. Attributable GEOs were compiled without consideration for the potential mining or metallurgical recovery of the metals contained in the mineral resource or reserve. Detailed Resource and Reserve estimation and applicable royalty or stream interests can be found at www.osiskogr.com.
24. The market value corresponds to the quoted price of the investments (including Osisko Gold Royalties’ position in Osisko Development Corp.) in a recognized stock exchange as at March 31, 2024.
25. Including the C\$200 million accordion, which is uncommitted and subject to acceptance by the lenders.
26. Dividend per GEO is calculated by dividing total dividends declared per year (CAD\$) by the total number of GEOs earned per year. Buybacks per GEO is calculated by dividing total share buybacks per year (CAD\$) by GEOs earned per year.
27. Operating cash flow per share is calculated by dividing net cash flows provided by operating activities from the royalties, streams and other interests segment for the year by the average number of basic common shares outstanding for the year.
28. Analyst consensus NAV per share as at December 31st of given year. Historic data retrieved from FactSet on July 10, 2024.
